Mr. John Stifel, Methods Engineer
Marlin Rockwell Corporation
Standard Division
Plainville, Connecticut

Dear Mr. Stifel:

Subject: ESBEC #680

This letter will confirm our telephone conversation of February 23rd regarding the composition of ESBEC #680.

This compound consists of abrasive plus the following chemicals: Medium Titer Soap, Sodium Metasilicate, Sodium Carbonate, Sodium Bicarbonate. There are no synthetic detergents or surface active agents of any type in the compound; therefore, the use of #680 could not possibly cause a re-occurrence of the problem encountered with the previous use of ESBEC #1 which did contain Nacconal DB, an ionic detergent.

If there is any more information you need, please do not hesitate to contact us.

Sincerely,

William A. Biebel
Vice President

CC: Mr. Morris S. Shipley
Mr. Joseph DeFazio
